INTRODUCTION

This is the One Hundred and Fifth edition of AGRICULTURAL STATISTICS FOR ONTARIO.

This report is compiled annually by the Statistical Services Unit of the Economics and Policy Coordination Branch, Ontario Ministry of Agriculture and Food, to serve as the source of agricultural statistics in the province. Data are prepared primarily by the Statistical Services Unit, in co-operation with the Agriculture/Natural Resources Division of Statistics Canada and various government departments and farm marketing boards.

Data in this volume are derived from three major sources. First, most agricultural production statistics are calculated from mail-in and enumerative surveys of farmers, with additional information supplied by government field officers, agribusiness personnel, and farm marketing boards. The second source is the Census of Agriculture which is conducted every five years. The Census serves as a "benchmark" for livestock inventory and crop area estimates as well as supplying a wealth of information on many other aspects of agriculture in this Province (eg. land use, farm types, rural population). The third source of statistics is commonly termed "administrative data". These data consist of complete or nearly complete counts of items such as imports, exports, farm taxfiler income, and marketings of inspected or controlled commodities.

The 1981 and 1986 Censuses of Agriculture officially adopted the following definition of a "census farm": an agricultural holding with annual sales of agricultural products of $250 or more. Some comparative data from the 1976 Census also appear in this issue, but for that year, the sales level of $50 is used as the lower limit in the definition of a census farm. Intercensal revisions to field crop areas and livestock inventories at the provincial level for the years 1982 to 1985 have not been completed at the time of publication, but should be available late in 1987.

Some newly published data appear in this edition. A series of tables pertaining to Ontario's food and beverage industry are presented in Section 2 of the publication. Included in this section are industry level statistics on food and beverage manufacturing, employment in the food chain, food store sales as well as the consumer price index for a number of food items during recent years. General economic indicators such as gross domestic product and personal expenditure data are given at the provincial and national levels in Table 24. Section 1, Financial Data and Population, has been enhanced with the addition of tables on labour force statistics, currency exchange rates, interest rates, farm bankruptcies and government payments to farmers. The per capita consumption of fruit and vegetable products has now been included and appears in Table 80.

As was the case with the 1981 issue, this edition of Agricultural Statistics for Ontario is a special expanded version. The additional pages are in the form of "county profiles" which contain many descriptive statistics as well as a number of frequency distributions extracted from the 1986 Census of Agriculture. This supplement can be found in the latter portion of the publication after the regularly established tables.

Finally, some caution should be used in comparing the area figures for fruit and vegetable crops which appear in Tables 73 and 75 with those appearing in the provincial level census profile (Table 171). In the former case, the intention is to measure the bearing area grown only for commercial purposes. These estimates have been derived from survey or administrative data. The latter figures, extracted from the 1986 Census, measure the total area of these crops reported on census farms, which may, in some instances, include non-bearing or non-commercial area. Tree fruit crops provide an example of where such discrepancies occur. County level estimates for the area, production, and farm value of commercially grown fruit and vegetable crops appear in the Annual Summary of the Seasonal Fruit and Vegetable Report.

Requests for additional information should be sent to the agency credited with the data or from the following Branch personnel responsible for compilation of the tables:

ACKNOWLEDGEMENTS

The preparation of this report would not be possible without the valuable assistance of many of the people involved in the agricultural industry of Ontario. These include farm correspondents who report on agricultural conditions throughout the year; farmers who return farm survey schedules; manufacturers and processors of agricultural products; commodity marketing boards; and various officials of the federal and provincial governments. Their contributions are gratefully acknowledged.

WEATHER CONDITIONS DURING 1986

January was a mild month with few major snowstorms. Northwestern Ontario had temperatures two to five degrees above normal. There was little accumulated snow in Ontario, except for a few areas in the snow belt which had several metres. Mild weather and heavy rains on the 19th reduced the snow cover across the south.

Snowstorms were prevalent in all parts of Ontario during February. Snowfall was frequent in the north and two storms hit southern Ontario during the first two weeks. Both storms dropped 15 to 20 centimetres of snow. After mid-month, fog and freezing precipitation were common throughout most of the province.

March was a month of temperature extremes. Early in the month, temperatures hit record lows. A large part of the province was covered with ice from freezing rainstorms on March 9 and 10. Mild temperatures arrived at mid-month causing dense fog. March 19 saw the start of an Arctic outbreak, the coldest for that time since 1967. During the final week, temperatures soared to record high values with highs in the mid-twenties on the Easter weekend.

Temperatures also fluctuated in April. Early and late periods of the month set many high temperature records. There were record cold temperatures and deficient hours of sunshine in the north. Precipitation was lighter in the south than the north where it consisted of both rain and snow.

Early May was cold and windy but temperatures returned to normal after the first week. In the south, frost caused damage to fruit and vegetable crops while the north was very dry. Thunderstorms, some with hail, occurred a few times during May. Some areas had flooding because of rapidly melting snow.

June was generally a cool and wet month except in northwestern Ontario which had unusually light rainfall. On June 16, severe thunderstorms developed and crossed southern Ontario. Funnel clouds and hail were seen in the southwestern area and tornadoes caused heavy damage in the central and eastern districts. This unstable weather continued to the month's end, damaging many crops in the south.

Temperatures remained close to normal during July but weather conditions were turbulent. Thunderstorms were frequent and accompanied by heavy downpours and hail. The northwest was the driest area in the province. The region had one major storm on July 5 when 144 mm of rain fell in six hours. The first weeks of July were hot and humid in southern Ontario and temperatures soared to the mid-thirties.

August brought unseasonal weather to southern Ontario. The first two weeks had rain almost every day. The intensity of the downpours caused flooding, especially in the Toronto area where totals for the month were as high as 270 mm. A severe hailstorm hit the Niagara fruit belt and the Holland Marsh area on August 1, causing heavy crop losses. It was much drier across northern Ontario, where temperatures averaged about normal.

September had a few dry days, then rain for the rest of the month. Temperatures were generally lower than usual. From the 6th to the 8th, southern Ontario had its first significant ground frost. Below freezing temperatures overnight put an end to the growing season in northern Ontario. Southern and central regions experienced heavy rain, thunderstorms and hail. The unending rain saturated fields, delayed harvesting and some crops rotted in the field.

The heavy rains finally stopped in October. Monthly precipitation amounts were below normal for most of the province. The first frost hit on the 10th and 11th but snowfall was limited to the areas north of Sudbury. On October 6, strong winds and record high water levels caused 2 metre waves along Lake Huron and Georgian Bay. This caused considerable damage to lakefront properties.

Winter weather arrived in November. In the northwest, temperatures were very cold. Several storms passed over the province leaving plenty of snow. The northwest had 30-50 cm dropped during near blizzard conditions on the 9th. The south received 20 cm of snow on two separate occasions. Monthly precipitation totals remained below normal and the winds again aggravated the high water levels in the Great Lakes.

December was unusually warm and dry in 1986. Temperatures were four to six degrees higher than normal in the north - the warmest December in northern Ontario since 1979. Central Ontario temperatures were about three degrees above normal. Precipitation was 50 to 80 percent of normal. Snowfall was light; only 30 to 80 percent of normal levels fell across the province.

Corn Heat Unit Accumulation and Rainfall Received at Selected Weather Stations in 1985 and 1986

Station	Year	Corn Heat Units				Rainfall (mm)
		May 11 to June 22	May 11 to July 19	May 11 to August 16	May 11 to September 13	April 1 to September 27

[a] Includes participation payments made by the Canadian Wheat Board or the Ontario Wheat Producers' Marketing Board direct to producers of crops delivered in previous years.

[b] Includes C.W.B. cash advances minus C.W.B. cash advance repayments together with the liquidated deferred grain receipts of 1985 minus receipts of grain shipped in 1986 for which payment is deferred to 1987.

[c] In addition to receipts for other crops, includes net non-grain cash advances.

[d] Payments made under the authority of the Agricultural Stabilization Act.

[e] Includes payments made under various acts in force in the respective provinces -- see Statistics Canada Catalogue 21-001 for further explanations.

- Represents less than 0.05%

[a] Only average crop year prices for winter wheat, white beans and tobacco are shown, as these crops are sold by marketing boards and monthly prices have no significance.
[b] The mean crop year price for grain corn and soybeans is calculated by weighting monthly prices with marketings.
n/a Not available.
Note: Monthly prices are average prices received by farmers at the farm or first local delivery point. The reference date is the fifteenth of each month.

[a] Pool price reported by Ontario Pork Producers' Marketing Board.
[b] Weighted average of prices reported in Agriculture Canada, Poultry Market Report for various grades.
Note: Monthly prices are averages received by farmers at the farm or first local delivery point. The reference period is the middle of each month. Annual prices are simple averages of the monthly prices.

[a] The nth percentile of an item is the value below which n percent of those reporting that item lie. The 50th percentile is the median value.

Notes: A farm taxfiler is a taxfiler who reported positive gross income or non-zero net income from unincorporated, self-employed farming activity. Users of farm income data are advised that there are major conceptual differences between the taxfiler data presented above and the income estimates appearing in Table 4.

[a] Many of the programs which are included are those providing remuneration for various factors of production. Excluded are programs which provide compensatory payments for capital goods.
[b] Payments made under the Western Grain Stabilization Act.
[c] Includes payments made under the Agricultural Stabilization Act and Health of Animals program.
Years refer to the calendar years in which payments are made.

[a] The nth percentile of an item is the value below which n percent of those reporting that item lie. The 50th percentile is the median value.

Notes: A farm taxfiler is a taxfiler who reported positive gross income or non-zero net income from unincorporated, self-employed farming activity. Users of farm income data are advised that there are major conceptual differences between the taxfiler data presented above and the income estimates appearing in Table 4.

Food, Beverage and Restaurant Expenditure as a % of Personal Disposable Income	1985	-	16.9	-
Food, Beverage and Restaurant Expenditure as a % of Total Personal Expenditure	1985	-	19.9	-

[a] Gross Domestic Product at factor cost is a measure of the unduplicated value of economic production arising within specified geographic boundaries. The value contributed by an industry is the residual derived by deducting the value of goods and services purchased and used in the production process from the value of goods and services produced by that industry. Gross Domestic Product at market prices is an expenditure- (or equivalently, an income-) based concept which measures personal, government and business expenditures, value of changes in inventories and transactions with non-residents.

[b] For Canada, estimated as 65% of total GDP from accommodation and food services. Ontario was assumed to have just under 39% of the national total.

[c] Consists of total personal income less personal direct taxes and other current transfers to government from persons.

[d] Consumed at home.

[e] For Canada, estimated as 75% of total expenditures on restaurants and hotels.

n/a Not available.

Selected Census Data

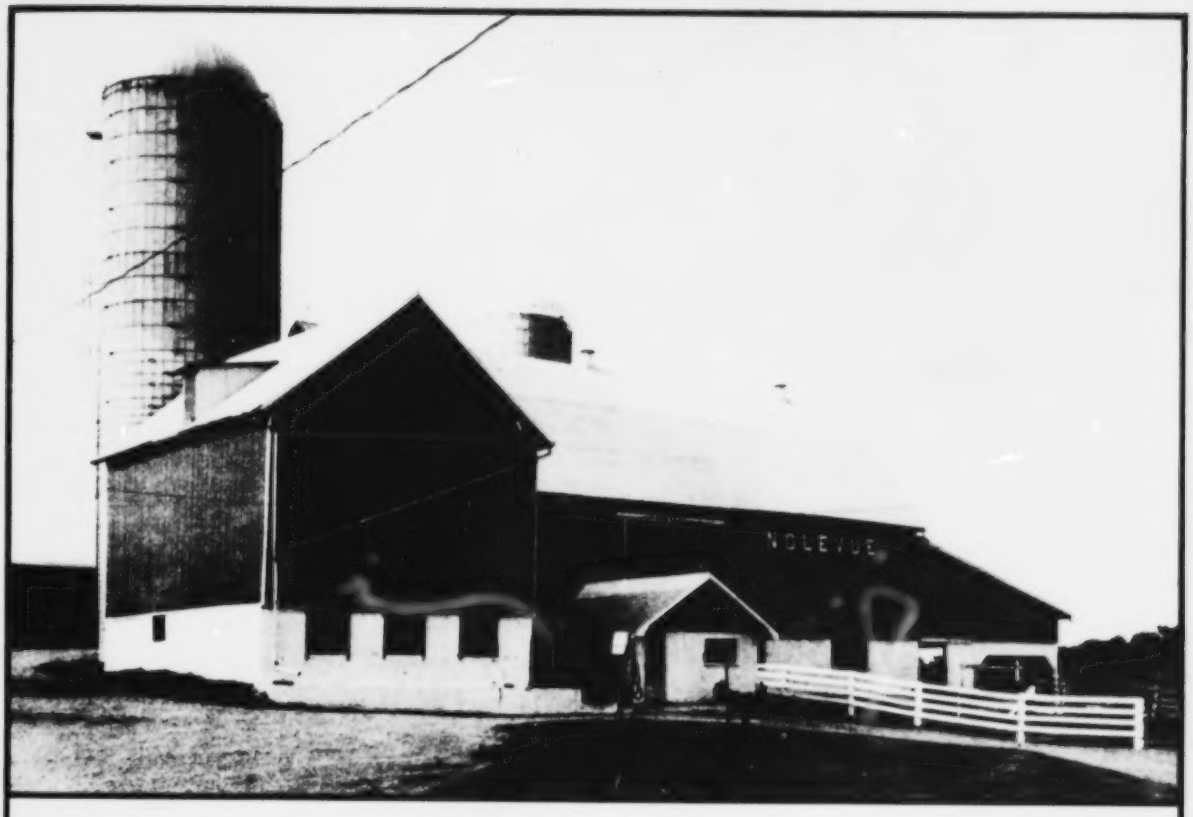

Table		Page
30.	Basic Farm Data, 1976, 1981, and 1986 Census of Agriculture	25
31.	Number and Area of Census Farms by County, 1976, 1981 and 1986	26
32.	Area of Improved Land and Crop Land of Census Farms, by County, 1976, 1981 and 1986	27
33.	Area of the Components of Improved and Unimproved Farm Land by County, 1986	28
34.	Census Farms Classified by Size of Operation, by County, 1986	29
35.	Census Farms Classified by Economic Class and Total Value of Sales, by County, 1986	30
36.	Census Farms with Sales of $2,500 or more, Classified by Major Product Type, by County, 1986	31
37.	Census Farms Classified by Capital Value and Total Farm Capital Value, by County, 1986	32
38.	Rural and Total Population, by County, 1981 and 1986 Census	33
39.	Machinery on Census Farms by County, 1986	34

Table 30 - Basic Farm Data, 1976, 1981 and 1986 Census of Agriculture

Item	Unit	1976	1981	1986	% Change 1986/1981
TOTAL CENSUS FARMS[a]	number	88,801	82,448	72,713	-11.8
CENSUS FARMS CLASSIFIED BY SALES					
Number of farms with annual sales of:					
$2,500 or more	number	67,613	68,960	63,253	-8.3
$10,000 or more	number	44,048	49,984	48,543	-2.9
$25,000 or more	number	27,664	36,032	35,923	-0.3
LAND AREA					
Total land area in province	acres	226,702,720	226,702,720	226,702,720	0.0
Area in census farms	acres	15,473,011	14,923,280	13,953,009	-6.5
% of total land in census farms	%	6.8	6.6	6.2	
Total area owned	acres	11,961,854	11,351,995	10,451,724	-7.9
Total area rented	acres	3,511,157	3,571,297	3,501,285	-2.0
USE OF AGRICULTURAL LAND					
Improved land	acres	11,069,343	11,165,587	10,119,332	-9.4
Under crops	acres	8,665,845	8,976,664	8,544,820	-4.8
Pasture	acres	1,836,696	1,623,506	1,065,731	-34.4
Summer fallow	acres	186,652	156,440	198,517	26.9
Other improved land	acres	380,150	408,977	310,264	-24.1
Unimproved land	acres	4,403,668	3,757,928	3,833,677	2.0
Woodland	acres	2,057,471	1,834,240	1,451,863	-20.8
Other unimproved land	acres	2,346,197	1,923,688	2,381,814	23.8
Major crop areas:					
Winter wheat	acres	515,849	504,994	641,427	27.0
Spring wheat	acres	18,334	22,048	75,704	243.4
All oats	acres	544,797	326,383	261,941	-19.7
Barley for grain	acres	370,888	466,602	576,368	23.5
Mixed grain	acres	826,323	783,311	534,011	-31.8
Rye	acres	56,956	89,789	56,687	-36.9
Buckwheat	acres	11,381	12,892	14,053	9.0
Soybeans	acres	377,850	689,061	939,738	36.4
Canola	acres	671	2,135	92,631	4,238.7
Grain corn	acres	1,580,228	2,171,777	1,829,220	-15.8
Fodder corn	acres	864,220	643,222	469,725	-27.0
Flaxseed	acres	12,338	11,123	8,437	-24.1
Dry beans	acres	171,629	163,006	135,514	-16.9
Hay	acres	2,851,549	2,575,119	2,473,080	-4.0
Tobacco	acres	84,418	120,423	64,687	-46.3
Fruit	acres	87,137	79,354	84,098	6.0
Vegetables (including potatoes)	acres	188,865	191,354	188,986	-1.2
Nursery products	acres	12,776	13,863	14,726	6.2
Total of above crops	acres	8,576,209	8,866,456	8,461,033	-4.6
LIVESTOCK ON FARMS					
Bulls	number	40,658	34,435	25,677	-25.4
Dairy cows and heifers	number	865,270	832,956	729,063	-12.5
Beef cows and heifers[b]	number	889,366	774,725	691,488	-10.7
Steers	number	758,716	622,781	424,326	-31.9
Calves under one year	number	605,498	633,597	571,231	-9.8
Total cattle and calves	number	3,159,508	2,898,494	2,441,785	-15.8
Sows and gilts, 6 months and over	number	216,384	368,599	336,033	-8.8
All other pigs	number	1,697,277	2,797,238	2,782,557	-0.5
Total pigs	number	1,913,661	3,165,837	3,118,590	-1.5
Sheep and lambs	number	140,832	251,537	209,593	-16.7
Horses (on census farms only)	number	-	74,986	74,961	-0.0
Hens and chickens	number	29,972,196	33,915,205	32,008,175	-5.6
Turkeys	number	4,076,036	4,015,561	3,108,852	-22.6
MACHINERY ON FARMS					
Tractors	number	175,918	178,041	187,165	5.1
Combines	number	25,475	25,134	23,740	-5.5
Forage harvesters	number	15,799	16,351	14,513	-11.2
Balers	number	39,124	39,530	37,282	-5.7
FARM CAPITAL					
Total capital value	$'000	16,973,114	31,283,175	23,737,180	-24.1
Land and buildings	$'000	13,822,338	25,298,785	17,972,488	-29.0
Machinery and equipment	$'000	1,940,183	3,462,135	3,695,760	6.7
Livestock and poultry	$'000	1,210,593	2,522,255	2,068,932	-18.0
HIRED LABOUR					
Farms reporting any	number	28,702	34,023	36,941	8.6
Farms reporting year-round	number	6,703	10,722	9,938	-7.3
Farms reporting seasonal	number	-	26,812	31,927	19.1
Total weeks of hired labour	weeks	1,283,292	1,721,178	1,920,119	11.6

[a] For 1976, includes holdings with sales of agricultural products during the year of $50 or more. For 1981 and 1986, includes sales of $250 or more.
[b] Includes both beef replacement and slaughter heifers.

[a] Adjusted to reflect the geographic boundaries of the 1986 Census.

Notes:

1) Total population figures for 1986 do not include estimates for those persons on incompletely enumerated Indian reserves.
2) Rural farm population includes all persons living on census farm holdings located in non-urban areas. Urban population is defined as those persons living in a population concentration of 1,000 or more where the density is 400 or more per square kilometer.
3) Rural population figures for 1986 were not available at time of printing, but should be available on a request basis by September 1987.

[a] In most cases, marketed production and farm value per pound statistics have been assembled by the Ontario Flue-Cured Tobacco Growers' Marketing Board according to the historical location of farm reference numbers. Acreage estimates are based on the June 3, 1986 Census of Agriculture.

The 1986 marketed production figures for flue-cured tobacco include an estimated carry-over of 20 million pounds from the 1985 crop. Provincial yields for 1985 and 1986 have been adjusted to reflect the true situation for each year's crop. Total farm value, which is the product of marketed production and farm value per unit, includes the value of the carry-over with the 1986 figures. A similar situation occurred between 1981 and 1982 when carry-over was estimated to be 30 million pounds.

The total production of the 1986 flue-cured tobacco crop was estimated at about 110 million pounds. Since it is not possible to distribute this quantity at the sub-provincial level, yield estimates are not available on a county basis.

[b] Figures provided by the Burley Tobacco Marketing Association of Ontario. No burley tobacco was grown in 1985 or 1986.

[c] Figures provided by the Imperial Leaf Tobacco Company of Canada Limited.

n/a Not available.

[a] Classification of milk:

Class 1 - fluid milk
Class 2 - concentrated liquid milk
Class 3 - fluid creams, cottage cheese yogourt, and fluid plant inventories.
Class 4 - ice cream mixes, confectionery products, puddings, soups, sterilized infant foods.
Class 4(a) - specialty cheese.
Class 4(b) - brick and colby cheese
Class 5 - butter, casein, condensed and evaporated milk, skim milk powder, whole milk powder, fluid plant.
- losses up to two percent, and industrial plant inventories.
Class 5(a) - cheddar cheese.
Class 5(ax) - over the counter sales.
Class 6 - new products.
